MOTORISATIONS
FOR INTERIOR WINDOW COVERINGS

Get your creations moving...

HOME MOTION by
somfy®

With Somfy, control your indoor blinds

With Somfy's 100% WireFree™ motors, enhance your creations without changing their design or making them more complicated to fit. With 100% autonomous, motorised indoor blinds and no need for an electrical connection, you can offer your customers the opportunity to bring their décor to life, as well as providing a genuine “plus” to their daily comfort.

And that makes all the difference!

BLINDS

ROLLER BLINDS

That simply
changes everything!

Bring your décor to life with WireFree™ motors

No constraints in how you control indoor blinds

- It takes just 15 minutes to fit a motorised blind, exactly the same as for a hand-operated blind.
- No electrical connection: no additional installation costs.
- No wires between the motor and the control unit: no damage to walls.
- Convenient functions that will change your customer's lifestyle.

100% innovation

NEW!

Power supply with solar panel:
energy saving and guaranteed in all weather conditions, even in low light.

- Low-consumption 12V motor (patented by Somfy) powered by solar panels or by batteries: when not in use, the motor consumes zero energy. The battery lasts for over 5 years.

WireFree™ motors are suitable for all types of indoor blind.

- Roller blinds.
- Pleated and woven wooden blinds.
- Aluminium Venetian blinds.
- Wooden Venetian blinds.
- Roman blinds.

Motorised blinds offer greater comfort for your customers

- Visual comfort: cuts down glare and reflections on TV and computer screens.
- The inside of your home stays cool during the hottest days of summer.
- Décor protection: floors, carpets, furniture and plants stay fresher for longer.

Automated motorised blinds provide better protection

- The wireless sun sensor closes the blinds automatically as soon as sunlight hits the window, even when there's nobody at home. The occupant can override the automatic devices at any time, either by disabling the sensor or via the remote control.

WIREFREE™ MOTORS FOR INTERIOR WINDOW COVERINGS

Add more comfort to your décors, with no wires and no hassle

Somfy's know-how brings the comfort of motors to indoor blinds.

No more strings to pull and no need to move to manage natural light effectively and create the atmosphere you want.

WireFree™ sets your creativity free to dream up innovative ideas for your customers.

Fitted in 15 minutes

No electrical wires:

An indoor blind with a WireFree™ motor is fitted in exactly the same way as a hand-operated blind and requires no special skills.

The blind's appearance is preserved:

The motor is completely invisible.

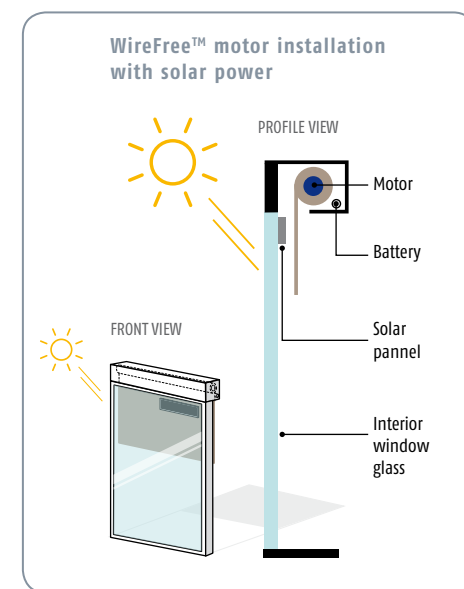

The appearance of the façade is preserved:

The mini solar panel is discreetly integrated into the façade (for solar-powered systems).

Choosing is easy

Power supply technology:

- Powered by a solar panel connected to a special long-life battery – no need to change the battery.
- Powered by conventional long-life batteries (approx. 5 years)*

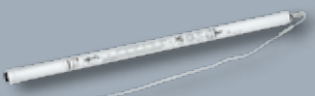

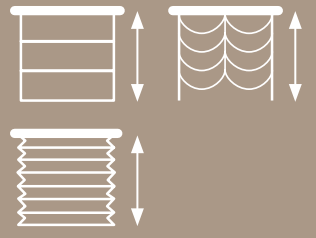

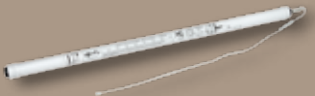

Wireless control unit technology:

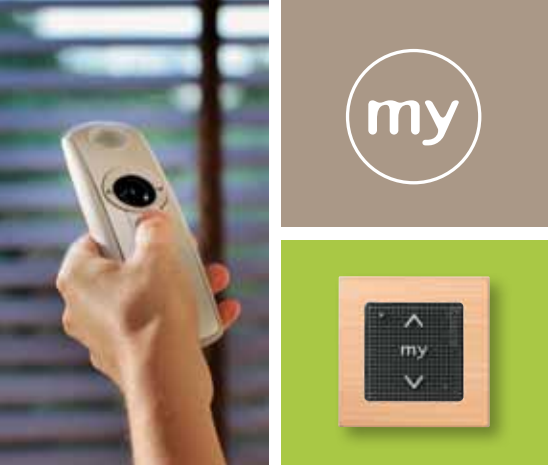

- RTS Radio Technology Somfy®**
- Remotely control blinds from up to 20m away, even through two concrete walls. RTS control units fit perfectly with all décors.
- Over 10 million installations worldwide: the industry-standard radio technology for home openings.
- Expandable installations: you can add extra control units or new motorized installations according to the user's requirements without having to reconfigure the existing installation.

WireFree™ motors for indoor blinds are also available with infrared technology.

* depending on use

With Radio Technology Somfy®, you get an added luxury: customised control solutions for indoor blinds.

REMOTE CONTROLS

Telis 1 RTS ■ Telis 4 RTS

To operate a single blind or a group of blinds per room.

- 1-channel or 4-channel remote control + 1 channel for centralisation.
- Functions: up, down, stop and "my" favourite position.

▼ The Somfy advantage:

The "my" function to memorise your favourite position (for example blind half-down) and retrieve it immediately by pressing this key. Simple to programme and to modify.

4 finishes

PURE SILVER LOUNGE PATIO

Telis 1 Modulis RTS ■ Telis 4 Modulis RTS

To remotely control one or more Venetian blinds in a single room.

- 1 channel or 4 + 1 channel Venetian blind remote control for centralisation.
- Central thumbwheel for accurate adjustment of the slat tilt.
- Functions: up, down, stop and "my" favourite position.

▼ The Somfy advantage:

The central thumbwheel provides accurate and intuitive slat tilt adjustment for Venetian blinds. Somfy has invented the perfect natural light brightness control.

SENSOR

Sunis Indoor WireFree™ RTS

To automate a single blind according to sunlight levels.

Wireless indoor sun sensor for one window:

- In summer, the blind is lowered automatically once sunlight hits the window.
- In winter, the sensor can be disabled easily, leaving the blind open to benefit from the sun's heat.

Somfy service quality makes all the difference!

The Somfy brand is a byword for quality and innovation for motors, controls and automatic devices for all openings in the home.

Somfy, pioneer of the universal, interoperable product range, has invented Home Motion to enable your customers to control their indoor blinds, curtains, roller shutters, etc. using the same remote control unit. All Somfy products are interoperable – i.e. they are designed to work together in a coordinated way.

Somfy today...

- > Exclusive technologies.
- > Present in 54 countries.
- > Somfy delivers anywhere in the world within 48 hours.
- > Efficient industrial facilities for flexible, customer-oriented organisation.
- > An organised network of 14,000 specially trained installers.
- > Over 32,000 customers and 270 million users.

Motors and solar panels guaranteed for 5 years

Batteries guaranteed for 2 years
